MERIDIAN FORGE / WEEK 03 / ANALYST DOCUMENT

Stakeholder Map

Stakeholder Map · Revision 1110

Proposed QA Control Review / participation and decision rights

PEOPLE Who is affected?	RELATIONSHIPS Who contributes and decides?	NEXT CONVERSATIONS What needs confirmation?

1. People and roles

QA and night-shift operators

The people affected are Nia, Night QA supervisor, and night-shift operators who perform checks and record exceptions.

Engineering

Elias is the robotics system engineer that contributes by explaining the available command and scheduler records and reviewing whether technical interpretations are supported.

Operations

Mara is a production operations manager that needs a clear decision making route and a practical summary of who must be consulted before detailed requirements are gathered.

Sponsor and record custodian

The authorizing sponsor receives recommendations routed through Operations and can authorize the proposed work within the organization’s approval process

2. Relationships and next steps

Competing needs and tradeoff

The daytime meetings may be convenient for managers and other daytime staff but difficult for night-shift operators who need time to rest or attend shift duties

Consultation plan

The consultation plan should involve Nia Voss, the Night QA Supervisor, the night-shift operators, the responsible Engineering and Operations contacts, and the individuals authorized to approve funding and a restart.

Missing voices and validation

First, which night-shift operator will represent the people who perform QA checks and record exception, Second, who has formal authority to approve funding and authorize a restart.

Next step toward requirements

after the stakeholder map, they should confirm the missing participants and decision making responsibilities before conducting detailed requirements interviews.

3. Book evidence connection

Book form connection

The tools help organize the stakeholder consultation by identifying each person’s role, needs, and priorities. The identity building questions also help stakeholders explain their experience and strengths, making it easier to understand what each person can contribute to the project.
